

## FRACTURE ANALYTICS

Materials Safety Evaluation

COMPANY | FACTSHEET

Date: 9/2021

## AT A GLANCE

**FRACTURE ANALYTICS** is a private evaluation and research company from Austria. It is specialized in the fracture-analytical safety evaluation of adhesives, composites and materials for industrial high-tech applications. The investigations are carried out on our own initiative using "MYSTERY TESTING" and directly with manufacturers & users.

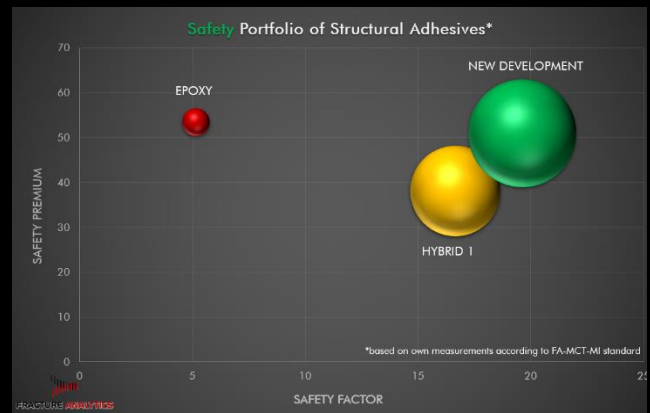

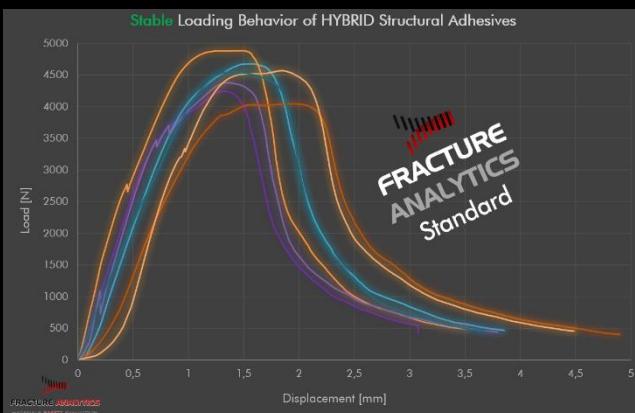

## COMPETENCE

**FRACTURE ANALYTICS** is the leading provider in fracture-analytical interface evaluation of adhesives and multi-material composites under cracking. The focus of our activities is based on the role of a strong research partner for R&D and on that of a service-oriented consultant for decision-makers.
